

# 4 Rs Barista

Everyone loves a latte – but no one wants a landfill in their backyard. Help your local coffee shop encourage customers to reduce, reuse, repair, and recycle by designing a coffee cup with a message.

Read the "Energy Efficiency" text in the *Intermediate Energy Infobook*. Around the outside of the coffee cup, write five tips or suggestions for ways to save energy by reducing, reusing, repairing, and recycling. Then, decorate the coffee cup. Include symbols and pictures if you want. Encourage the coffee lover to reduce, reuse, repair, and recycle.
