

Energy Sources in the News

Hunt around your home or community to find an example of a source of energy in use. Read about the source of energy in the *Intermediate Energy Infobook*. Make a 1-3 minute video clip in the style of a news report that describes the energy source. News reports must include the following information:

1. Name the source of energy.
2. Is it renewable or nonrenewable?
3. Explain where it comes from or how it is made.
4. Give an additional example of how it is used as energy.
5. How does it affect the environment?
6. Share one disadvantage of using this source of energy.
7. Share one advantage of using this source of energy.
8. Share a fun fact about this source of energy.

Make sure to use the video software your teacher recommends. Save the file with your name and source in the file name. Upload the file to your teacher.
